

**Blockhouse Furniture remains, at its core, an American institution that proudly bleeds red, white, and blue. We are and have always been a Made in America! brand - made by Americans. With our materials sourced in the USA, we do not anticipate supply issues or concerns due to tariffs. This also proved to be true during the pandemic. Blockhouse will continue our current business model and strategy as it has proven successful and beneficial to both parties for decades. Rest assured, you can continue putting your trust in Blockhouse - and we sincerely thank you for that.**
